General Description

MAX233ACWP is a specific model of a RS-232 transceiver integrated circuit (IC) that is manufactured by Maxim Integrated. This IC is designed to convert logic level signals from a microcontroller or microprocessor to the RS-232 voltage levels required for communication with other serial devices such as modems, printers, and other peripherals.

Features

- Operates from a single 5V power supply
- Four receivers and transmitters
- Supports data rates up to 120kbps
- Low power consumption
- ESD protection on all RS-232 I/O pins
- Available in a 20-pin wide SO package

Application

- Industrial automation systems
- Serial communication in instrumentation
- Data acquisition systems
- Point of sale systems
- Telecommunications equipment
- Personal computers and peripherals
