General Description

XCV300-4PQ240I is a specific model of Field-Programmable Gate Array (FPGA) produced by Xilinx.

Features

It has 300,000 system gates, which allows for a high level of programmability and customization.

It has 240 pins and comes in a 240-pin plastic quad flat package (PQ240).

It operates at a maximum frequency of 200 MHz, allowing for fast processing of data.

It has a programmable interconnect structure that allows for flexible routing of signals.
