

IRFB4410ZPBF

Data Sheet

N-Channel MOSFET, 97 A, 100 V HEXFET, 3-Pin TO-220AB Infineon

Manufacturers	Infineon Technologies Corporation
Package/Case	TO-220AB
Product Type	Transistors
RoHS	Green
Lifecycle

<u>RFQ</u>

General Description

The StrongIRFETTM power MOSFET family is optimized for low $R_{DS(on)}$ and high current capability. The devices are ideal for low frequency applications requiring performance and ruggedness. The comprehensive portfolio addresses a broad range of applications including DC motors, battery management systems, inverters, and DC-DC converters.

Industry standard through-hole power package

High-current rating

Product qualification according to JEDEC standard

Silicon optimized for applications switching below <100 kHz

Softer body-diode compared to previous silicon generation

Wide portfolio available

Standard pinout allows for drop in replacement

High-current carrying capability package

Industry standard qualification level

High performance in low frequency applications

Increased power density

Provides designers flexibility in selecting the most optimal device for their application

Ovaga Technologies Limited

SMPS

UPS

Solar power inverter

DC motor drives

Battery powered applications

Features

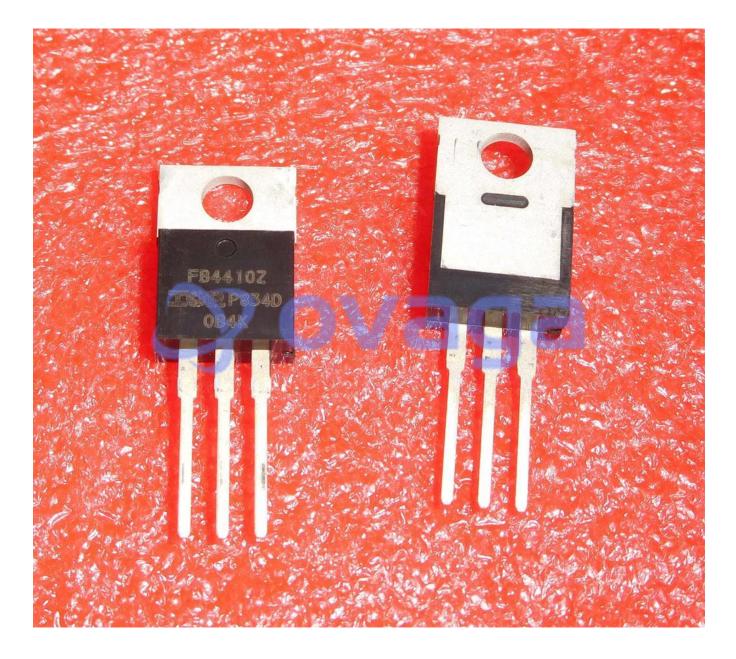

Application

Industry standard through-hole power package	SMPS		
High-current rating	UPS		
Product qualification according to JEDEC standard	Solar power inverter		
Silicon optimized for applications switching below <100 kHz	DC motor drives		
Softer body-diode compared to previous silicon generation	Battery powered applications		
Wide portfolio available			
Standard pinout allows for drop in replacement			
High-current carrying capability package			

- Industry standard qualification level
- High performance in low frequency applications

Increased power density

Provides designers flexibility in selecting the most optimal device for their application
