

ADG849YKSZ

Data Sheet

V/5 V CMOS 0.5 Ω SPDT Switch

Manufacturers Analog Devices, Inc

Package/Case SC70-6

Discrete Semiconductors Product Type

RoHS

RFO

General Description

ADG849YKSZ is a part number for a specific IC (integrated circuit) device manufactured by Analog Devices, Inc. It is a single-pole, single-throw (SPST) analog switch with low on-resistance and low power consumption.

Application Features

Low on-resistance of 2 Ohms typical at>

Low power consumption of 0.5 microamps (max) at>

Wide operating voltage range of 1.8V to 5.5V

High ESD (electrostatic discharge) rating of 4 kV (human body model)

Break-before-make switching action

Portable and battery-powered devices

Audio and video signal switching

Test and measurement equipment

Industrial control and automation

Communications systems

Medical devices
