

60VIN, 3A Silent Switcher Module Reg

Manufacturers	Analog Devices, Inc
Package/Case	BGA-48
Product Type	Power Management ICs
RoHS	
Lifecycle

General Description

The LTM8073 is a 60VIN, 3A (continuous) or 5A (peak) step-down Silent Switcher μ Module[®] (power module) regulator. Included in the package are the switching controller, power switches, inductor, and all support components. Operating over an input voltage range of 3.4V to 60V, the LTM8073 supports an output voltage range of 0.8V to 15V and a switching frequency range of 200kHz to 3MHz, each set by a single resistor. Only the input and output filter capacitors are needed to finish the design.

The low profile package enables utilization of unused space on the bottom of PC boards for high density point of load regulation. The LTM8073 is packaged in a thermally enhanced, compact over-molded ball grid array (BGA) package suitable for automated assembly by standard surface mount equipment. The LTM8073 is RoHS compliant.

Features

Complete Step-Down Switch Mode Power Supply

Low Noise Silent Switcher® Architecture

Wide Input Voltage Range: 3.4V to 60V

Wide Output Voltage Range: 0.8V to 15V

3A Continuous Output Current, 5A Peak

Parallelable for Increased Output Current

Selectable Switching Frequency: 200kHz to 3MHz

Programmable Soft-Start

6.25mm × 9mm × 3.32mm BGA Package

Application

Power for Portable Products

Distributed Supply Regulation

Industrial Supplies

Wall Transformer Regulation
