

# R1LP0408DSB-5SI#B0

Data Sheet

SRAM Memory IC 4Mb (512K x 8) Parallel 55ns 32-TSOP II

Manufacturers Renesas Technology Corp

Package/Case 32-SOIC (0.400, 10.16mm Width)

Product Type Memory

RoHS

Lifecycle

## **General Description**

The R1LP0408DSB-5SI#B0 is a 4 megabit (512 kilobyte) DRAM IC that provides high-speed data storage and retrieval. It is commonly used in various electronic devices to store temporary data during operation.

### **Features**

Memory Capacity: The R1LP0408DSB-5SI#B0 offers a capacity of 4 megabits or 512 kilobytes for storing data.

Organization: The memory is organized into multiple cells or storage locations, allowing for efficient data storage and retrieval.

Operating Voltage: The device operates on a specific voltage range, typically 3.3V or 5V, depending on the specific variant.

Access Time: The device has a specified access time, indicating the time it takes to read or write data.

Refresh Rate: DRAM requires periodic refresh cycles to maintain data integrity, and the R1LP0408DSB-5SI#B0 has a specified refresh rate.

## **Application**

System Memory: The R1LP0408DSB-5SI#B0 is commonly used as system memory in various electronic devices, such as computers, embedded systems, and consumer electronics.

Data Storage: It can be used for storing data in applications that require temporary storage, such as cache memory.

Industrial Applications: The device is suitable for use in industrial automation, automotive, and other industrial applications that require high-speed data storage.
