General Description

82551QM is an Ethernet controller chip manufactured by Intel Corporation. It was released in 2001 and is designed to provide high-performance networking capabilities to computer systems.

Features

PCI interface: The chip uses a PCI interface to connect to the computer's motherboard, providing high-speed data transfer capabilities.

10/100 Mbps Ethernet: The chip supports both 10 and 100 Mbps Ethernet speeds, making it compatible with a wide range of network devices.

Advanced networking features: The 82551QM supports features such as Wake-on-LAN, VLAN tagging, and jumbo frames, which help to optimize network performance and improve reliability.
