

## ADG708BRUZ-REEL7

Data Sheet

Analog Multiplexer Single 8:1 16-Pin TSSOP T/R

Manufacturers Analog Devices, Inc

Package/Case TSSOP-16

Product Type Analog Switches Multiplexers; Dual Supply 2V to 8V

RoHS Rohs

Lifecycle

mmm

**RFO** 

## **General Description**

The ADG708 is a low voltage, CMOS analog multiplexers comprising eight single channels. The ADG708 switches one of eight inputs (S1-S8) to a common output, D, as determined by the 3-bit binary addresslines A0, A1, and A2. An EN input is used to enable or disable the device. When disabled, all channels are switched OFF.

Low power consumption and operating supply range of 1.8 V to 5.5 V make the ADG708 ideal for battery-powered, portable instruments. All channels exhibit break-before-make switching action preventing momentary shorting when switching channels.

The ADG708 is available in a 16-lead TSSOP package. The ADG709 is a 4 Channel Differential Multiplexer.

**Features** 

1.8 V to 5.5 V Single Supply

 $3 \Omega$  ON Resistance

 $0.75 \Omega$  ON Resistance Flatness

100 pA Leakage Currents

14 ns Switching Times

Single 8-to-1 Multiplexer ADG708

Differential 4-to-1 Multiplexer ADG709

16-Lead TSSOP Package

Low Power Consumption

TTL-/CMOS-Compatible Inputs
