## General Description

EPM7032LC44-10 is a type of Complex Programmable Logic Device (CPLD) produced by Intel (now Altera).

## Features

It has 32 macrocells, which can be configured as either combinatorial or registered logic

It has 32 inputs and 32 outputs

It has a maximum operating frequency of 133 MHz

It has a 10ns propagation delay

It operates with a 5V power supply

## Application

EPM7032LC44-10 can be used in various digital logic applications such as data communication, control systems, and signal processing.

It is commonly used for board-level designs that require low-power and high-speed performance.
