General Description

DT28F320S5-90 is a specific model of a flash memory device manufactured by Intel Corporation. It is a member of the Intel StrataFlash Memory family, which is a type of NOR flash memory commonly used in embedded systems.

Features

Density: 32 Megabits (4 Megabytes)

Organization: 4 M x 8 or 2 M x 16

Voltage Range: 2.7V to 3.6V

Access Time: 90 ns

Package: 56-pin TSOP (Thin Small Outline Package)

Application

Embedded systems: DT28F320S5-90 can be used as non-volatile storage in a wide range of embedded systems such as industrial control systems, automotive electronics, consumer electronics, and more.

Firmware storage: It can be used for storing system firmware, boot code, BIOS, and other critical software in various embedded systems.

Code execution: DT28F320S5-90 can be used for storing and executing code directly from the flash memory in systems that require code to be executed directly from non-volatile storage.
