

Data Sheet

OP Amp Dual GP R-R O/P  $\pm 15V/30V$ 

Manufacturers Analog Devices, Inc

Package/Case PDIP-8

Product Type Amplifier ICs

RoHS Pb-free Halide free

Lifecycle

**RFO** 

## **General Description**

The AD8222 is a dual-channel, high performance instrumentation amplifier that requires only one external resistor per amplifier to set gains of 1 to 10,000.

The AD8222 is the first dual-instrumentation amplifier in the small 4 mm  $\times$  4mm LFCSP. It requires the same board area as atypical single instrumentation amplifier. The smaller package allows a  $2\times$  increase in channel density and a lower cost perchannel, all with no compromise in performance.

The AD8222 can also be configured as a single-channel, differential output instrumentation amplifier. Differential outputs providehigh noise immunity, which can be useful when the outputsignal must travel through a noisy environment, such as withremote sensors. The configuration can also be used to drivedifferential input analog-to-digital converters (ADCs). The AD8222 maintains a minimum CMRR of 80 dB to 4 kHz for allgrades at = 1.

The AD8222 operates on both single and dual supplies and only requires 2.2 mA maximum supply current for both amplifiers. It is specified over the industrial temperature range of -40°C to +85°C and is fully RoHS compliant.

For a single-channel version, see the AD8221.

## **Features** Two channels in small 4 mm × 4 mm LFCSP Gain set with 1 resistor per amplifier> Low noise $8 \text{ nV}/\sqrt{\text{Hz}}$ at 1 kHz $0.25 \mu V p-p (0.1 Hz to 10 Hz)$ High accuracy dc performance (B grade) $60 \, \mu V$ maximum input offset voltage $0.3~\mu\text{V/}^{\circ}\text{C}$ maximum input offset drift 1.0 nA maximum input bias current 126 dB minimum CMRR> Excellent ac performance 140 kHz bandwidth> $13 \mu s$ settling time to 0.001%Differential output option (single channel) Fully specified Adjustable common-mode output

## **Application**

Multichannel data acquisition for

ECG and medical instrumentation

Industrial process controls

Wheatstone bridge sensors

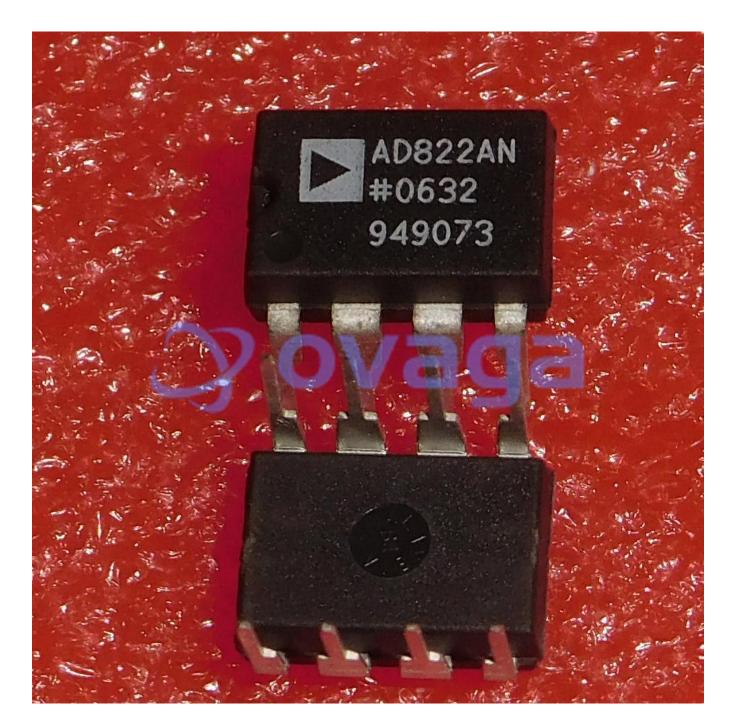

Differential drives for

High resolution input ADCs

Remote sensors

Supply range:  $\pm 2.3~V$  to  $\pm 18~V$ 

Available As Known Good Die and fully guaranteed to data sheet specifications
