## General Description

MAX313MJE is a specific integrated circuit (IC) manufactured by Maxim Integrated. It is a precision real-time clock (RTC) with an embedded temperature-compensated crystal oscillator (TCXO).

## Features

- A built-in TCXO that provides accurate timekeeping over a wide temperature range.
- Low power consumption, making it suitable for battery-powered applications.
- Automatic backup power switching, ensuring reliable operation during power outages.
- A serial interface for communication with a microcontroller or other digital device.
- A small package size and low profile, making it suitable for space-constrained designs.

## Application

- Wearable devices
- Smart home automation systems
- Industrial automation and control systems
- Medical devices
- Automotive systems
- Internet of Things (IoT) devices
