

Microcontroller, HCS12 Family S12D Series Microcontrollers, HCS12, 16bit, 25 MHz, 128 KB, 8 KB

Manufacturers	NXP Semiconductor
Package/Case	LQFP-112
Product Type	Embedded Processors & Controllers
RoHS	Rohs
Lifecycle

General Description

MC9S12DG128CPVE is a microcontroller unit (MCU) from NXP Semiconductors. It is a member of the HCS12 family and is based on the 16-bit S12 architecture. Here are some of its features:

Features

It has 128KB of flash memory and 8KB of RAM.

It has an 8-channel 10-bit analog-to-digital converter (ADC).

It has a variety of communication interfaces including two SCI (serial communication interface) modules, two SPI (serial peripheral interface) modules, and an I2C (inter-integrated circuit) module.

It has a 16-bit timer module and a 16-bit pulse width modulation (PWM) module.

It operates at a clock speed of up to 25 MHz.

It is compatible with CAN (controller area network) protocol.

Application

Engine management systems in automobiles

Motor control systems in industrial equipment

Home automation systems

Security systems

Medical equipment
