

## ADM3072EYRZ

Data Sheet

## 3.3 V, [15 kV ESD-Protected, Half- and Full-Duplex, RS-485/RS-422 Transceivers

Manufacturers

Analog Devices, Inc

Package/Case

SOP-8

Product Type

Interface ICs

RoHS

Rohs

**RFO** 

## **General Description**

The ADM307xE are 3.3~V, low power data transceivers with  $\pm 15~kV$  ESD protection suitable for full- and half-duplex communication on multipoint bus transmission lines. They are designed for balanced data transmission, and they comply with TIA/EIA standards: RS-485 and RS-422.

The devices have a ½ unit load receiver input impedance, which allows up to 256 transceivers on a bus. Because only one driver should be enabled at any time, the output of a disabled or powered-down driver is tristated to avoid overloading the bus.

The receiver inputs have a true fail-safe feature, which eliminates the need for external bias resistors and ensures a logic high output level when the inputs are open or shorted. This guarantees that the receiver outputs are in a known state before communication begins and when communication ceases.

**Features** 

TIA/EIA RS-485/RS-422 compliant

Data rates

Half- and full-duplex options

True fail-safe receiver inputs

Up to 256 nodes on the bus

Hot-swap input structure on DE and RE pins

Reduced slew rates for low EMI

Low power shutdown current (all except ADM3071E/ ADM3074E/ADM3077E)

Outputs high-Z when disabled or powered off

Common-mode input range: -7~V to +12~V

Thermal shutdown and short-circuit protection

8-lead and 14-lead narrow SOIC packages
