General Description

ADV7170KSU is a video digital-to-analog converter (DAC) manufactured by Analog Devices Inc. It is a high-performance device that can convert digital video signals into analog signals that can be used for displaying images on a monitor or TV.

Features

- Supports multiple video standards including NTSC, PAL, and SECAM
- 10-bit resolution
- Low power consumption
- On-chip voltage reference and programmable gain amplifier
- Composite and S-video outputs
- Internal color bar generation

Application

- Video editing equipment
- Professional video cameras
- Video projectors
- Medical imaging equipment
- Security systems
- Set-top boxes
