

RP15 (FW) Series - Powerline Regulated DC-DC Converters; Input Voltage (Vdc): 48V; Output Voltage (Vdc): 12V; 4:1 Wide Input Voltage Range; 15 Watts Regulated Output Power; 1.6kVDC Isolation; Over Current and Over Voltage Protection; Six-Sided Shield

Manufacturers	Infineon Technologies Corporation
Package/Case	SOP-20
Product Type	Power Management ICs
RoHS	
Lifecycle

General Description

Based on the information you provided, "BTS824R" appears to be a product or component that requires further clarification. However, based on my general knowledge, BTS824R could potentially refer to a part number or model number of an electronic component, such as a semiconductor device or integrated circuit (IC), that is commonly used in various applications.

Features

Voltage and current ratings: BTS824R may have specific voltage and current ratings, which determine its performance characteristics and capabilities.

Protection features: BTS824R may have built-in protection features such as overvoltage protection, overcurrent protection, and thermal protection to safeguard against damage from voltage spikes, excessive current, and high temperatures.

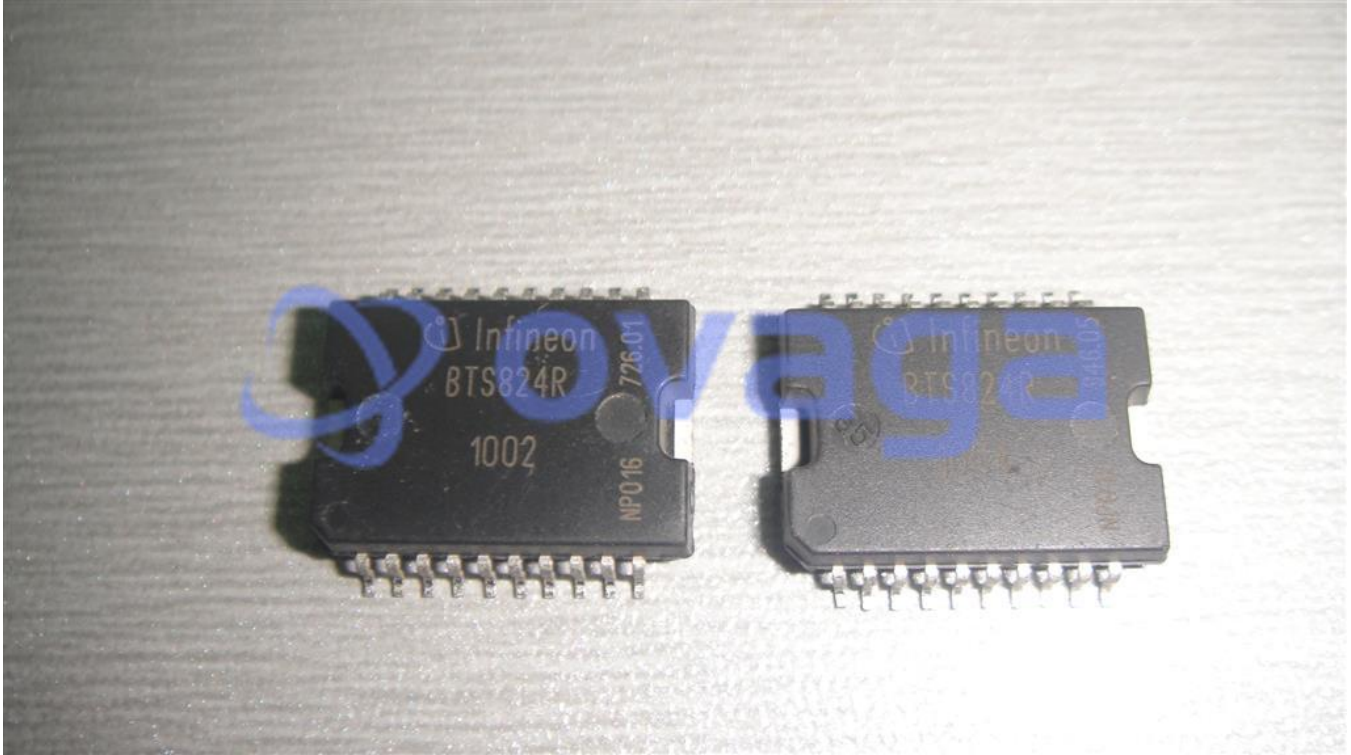

Control interface: BTS824R may have a specific control interface, such as a digital or analog input, to enable its operation and control in a system.

Application

Automotive electronics: BTS824R or similar components may be used in automotive applications such as motor control, lighting control, and power distribution in vehicles.

Industrial electronics: BTS824R or similar components may be used in industrial applications for motor control, power management, and automation systems.

Consumer electronics: BTS824R or similar components may be used in consumer electronics products like appliances, audio/video systems, and portable devices.
