PIC16F505-I/SL

MCU 8-bit PIC RISC 1.5KB EPROM 2.5V/3.3V/5V Automotive 14-Pin SOIC N Tube

Manufacturers	Microchip Technology, Inc
Package/Case	SOIC-14
Product Type	Embedded Processors & Controllers
RoHS	
Lifecycle

General Description

Features
GENERAL DESCRIPTION

The PIC12F508/509/16F505 devices from Microchip Technology are low-cost, high-performance, 8-bit, fully-static, Flash-based CMOS microcontrollers. They employ a RISC architecture with only 33 single-word/ single-cycle instructions. All instructions are single cycle (200 µs) except for program branches, which take two cycles. The PIC12F508/509/16F505 devices deliver performance an order of magnitude higher than their competitors in the same price category. The 12-bit wide instructions are highly symmetrical, resulting in a typical 2:1 code compression over other 8-bit microcontrollers in its class. The easy to use and easy to remember instruction set reduces development time significantly.

High-Performance RISC CPU:
